

Be the teacher! 😊 These fun activities help you learn. After you learn, teach your parents or a brother or sister about what you learned. You can also email me (Ms. Houtz) or your teacher to show off what you've learned.

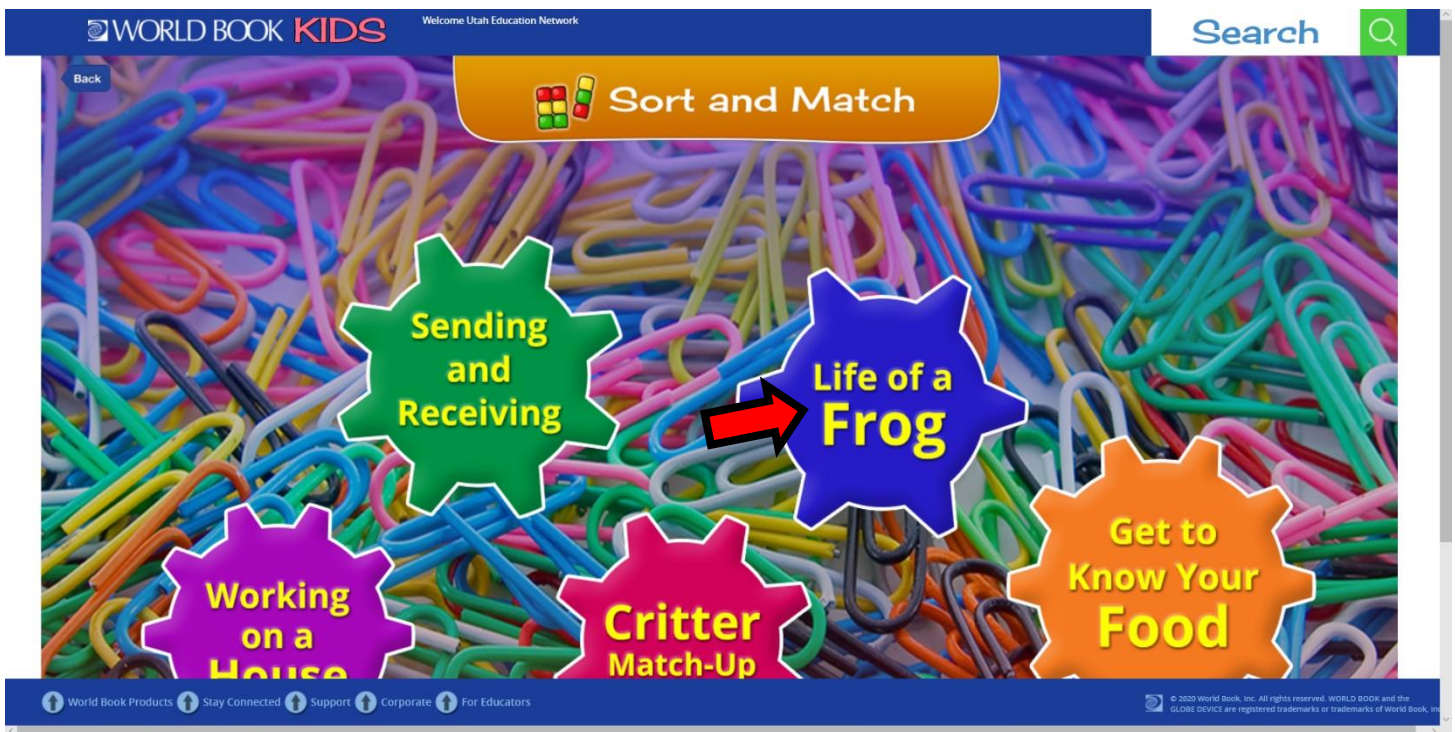

Utah Online (see the Library webpage or in your STUDENT APPLICATIONS folder). Go to **World Book Online**. Choose **Kids (balloon)**.

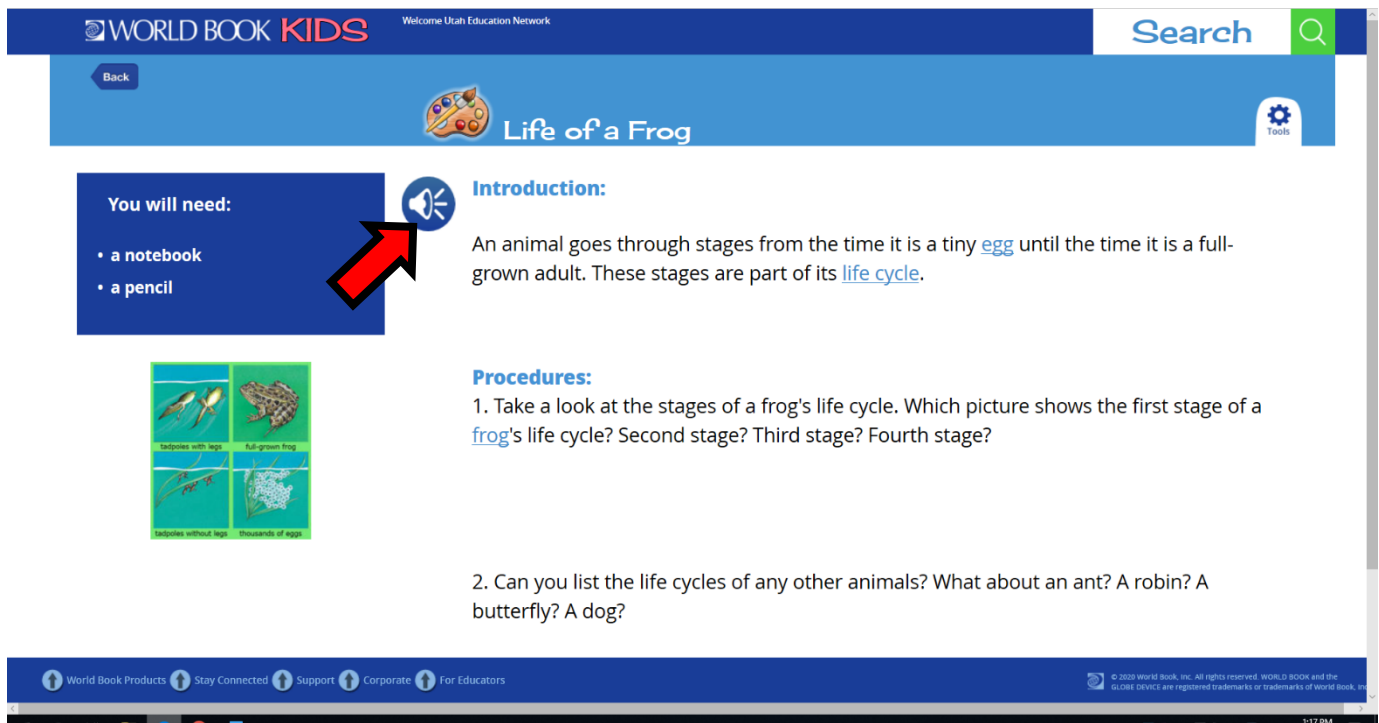

<https://www.worldbookonline.com/kids/home>

Try any of the activities.

The screenshot shows the World Book Kids website interface. At the top, there's a blue header with the 'WORLD BOOK KIDS' logo and a search bar. Below the header, a blue banner reads 'Life of a Frog'. On the left, a blue box titled 'You will need:' lists 'a notebook' and 'a pencil'. A red arrow points from this box to the 'Introduction:' section. The 'Introduction:' section contains the text: 'An animal goes through stages from the time it is a tiny egg until the time it is a full-grown adult. These stages are part of its life cycle.' Below this, the 'Procedures:' section lists two tasks: '1. Take a look at the stages of a frog's life cycle. Which picture shows the first stage of a frog's life cycle? Second stage? Third stage? Fourth stage?' and '2. Can you list the life cycles of any other animals? What about an ant? A robin? A butterfly? A dog?'. To the left of the procedures, there's a small image showing four stages of a frog's life cycle: tadpoles with legs, full-grown frog, tadpoles without legs, and thousands of eggs.

MAKE SURE YOUR COMPUTER'S **VOLUME IS ON!**

Scroll down and you will find the answers. Don't peek.

Be a smarty. Tell your parents something you learned. Even better, challenge them to ask a question about what you learned. **BE THE TEACHER!**

(Did you pick up your packet from your teacher the week of March 17? I put **Smarties** in there.

Will eating Smarties make you smarter? You know it!!! Only learning makes you smarter.)
